

Fun & easy way to learn braille

Taptilo

Early braille education is key to literacy,

...and literacy is key to employment.

For further statistics:

National Federation of the Blind

Ruby Ryles, 1998. "Research Study: Early Braille Education Vital"

Ruby Ryles, 1996. "The Impact of Braille Reading Skills on Employment, Income, Education, and Reading Habits."

But there are barriers to learning braille...

Why?

We listened to students and teachers.

“Traditional classes are **uninspiring and lacks engagement.**”

“Current learning tools **haven’t changed for years.**”

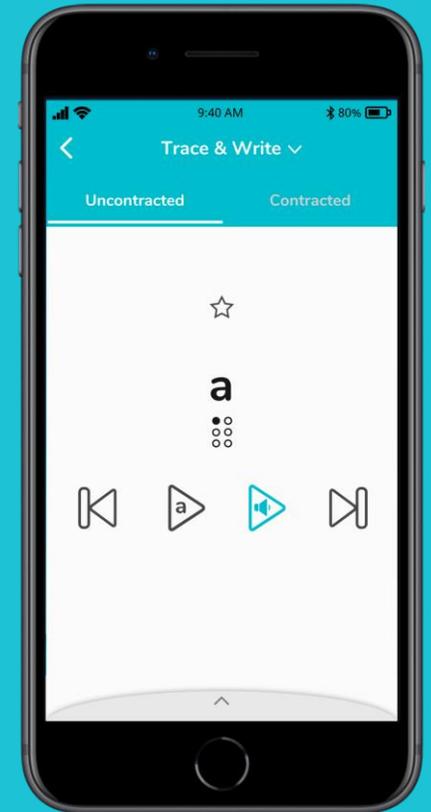

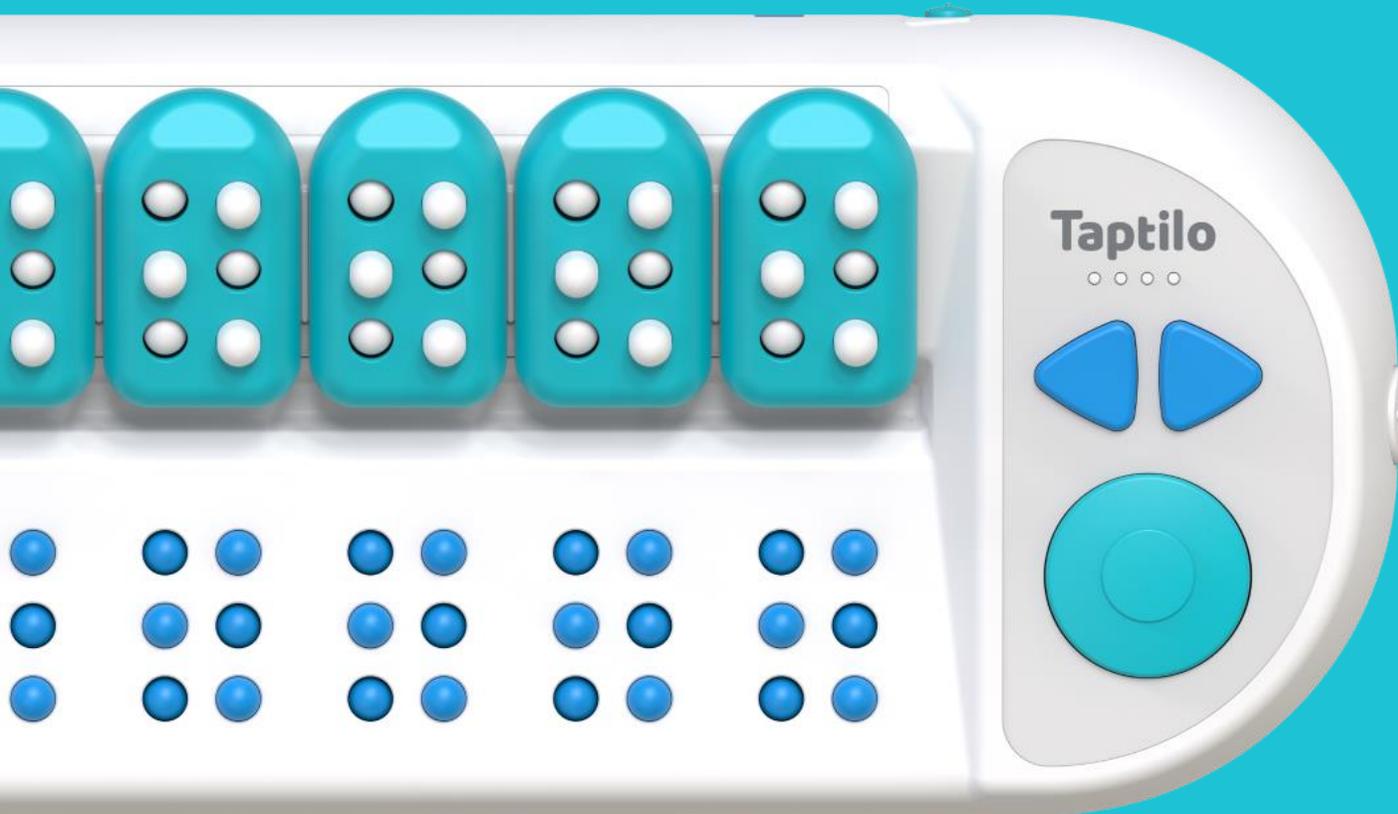

“There **aren’t enough teachers** who are qualified and available.”

“I wish there was a fun way to learn braille, **just like playing games.**”

It doesn’t have to be like this!

Taptilo

World's 1st smart braille education device that makes learning braille fun & easy!

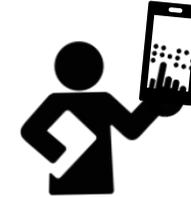

Interactive Braille Learning System

Self-learning

- Step-by-step audio guidance allows students to follow along at their own pace
- Large braille cells that are easy to tell

- Even non-braille users can teach

Interactive programs

- Immediate multi-sensory feedback for dynamic learning experience
- Read, trace & write, dictation, write, game

Various content

- 17 self-study games, 1000+ words
- Download new content with the app
- Easy software upgrades via app

"Taptilo is so amazing, I want everyone to understand that Taptilo is a **gamechanger** for individuals who want to learn braille."

—Vocational Rehabilitation Specialist, US

"My student is **in love** with Taptilo! I've never seen him so **focused**."

—Teacher for the blind, US

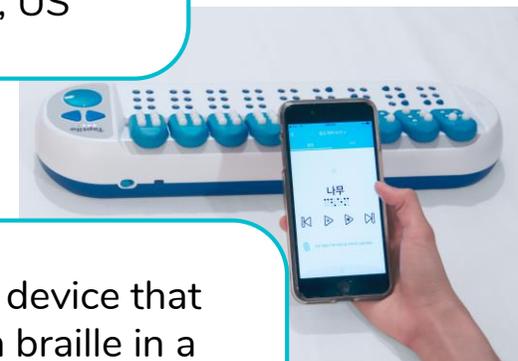

"Taptilo is **drawing people**, especially teachers, in like nothing else I've seen for a long time."

—VI Resource Technician, UK

"Taptilo is **changing people's perception** about the limits of blindness."

—Teacher for the blind, US

"All of the preschool students in the class wanted to **play with it!**"

—Teacher for the blind, US

"Taptilo is the first device that allows you to learn braille in a **fun, interactive** way."

—Teacher for the blind, US

The Case for Large Braille

“Results demonstrated that initially training children with large Braille tactually led to the **best subsequent learning of standard Braille.**”

– *British Journal of Educational Psychology*
